Comment On: NSF-2025-OGC-0001-0001
Request for Information: Development of a 2025 National Artificial Intelligence Research and Development Strategic Plan

Document: NSF-2025-OGC-0001-DRAFT-0007
Comment on FR Doc # 2025-07332

Submitter Information

Name: Maxim Kesin

General Comment

I think AI is very powerful and precarious technology (I was a Machine Learning engineer at big tech company). Tech companies are pushing the technology forward, and the government's role should be controlling negative externalities from such races, including primarily potentially catastrophic risks from powerful AI systems and secondarily sudden impacts to job markets.

I think we should also cooperate on the more extreme risks with the international players, e.g. China is clearly signaling their interest in safety. We should cooperate with others on safety even as we compete on other things.
