General Comment

Collaboration will be the cornerstone of success. Effective implementation of the 2025 Plan will demand coordinated action across federal agencies, partnerships between the public and private sectors, and principled engagement with international allies. A whole-of-nation approach is required to harness the full potential of AI for the benefit of the American people and to maintain U.S. leadership on the global stage. Continued dialogue and engagement with the broader AI community, including researchers, industry leaders, civil society organizations, and the public, will be vital as the plan is finalized and implemented. I appreciate the opportunity to provide this input and stand ready to support the ongoing efforts to shape a forward-looking and impactful national AI strategy.
