General Comment

AI needs data—lots of it. I would like to see the revised AI R&D strategic plan include affirmation to ensure all federal data, both historic and new, becomes Findable, Accessible, Interoperable, and Reusable (FAIR). I am seeing in the news that some of the existing federal data, such as ocean and atmospheric data, are becoming less accessible or even unavailable due to budget shortfalls. The AI R&D communities would like to see all existing federal data continue to be available to all US researchers.
