General Comment

I am university professor. I currently create AI for education. I am a recipient of NAIRR proceeds and have been pleased with that partnership for getting free resources to run my large models. We need more programs like that.

I feel funds should be made available for the following:

AI tutors for STEM education (creating next generation of AI scientists)
Advancing agentic and physically embodied AI
More easy to access to infrastructure support for all AI research and development communities
and finally,
Mechanist Interpretability - where we try to understand what is going on inside the black box.
