General Comment

- 1) Export controls are a must. Do not let Nvidia keep playing footsie with them and make sure the body enforcing them has enough resources.
- 2) Limit non-US allied students from entering the US (India, China in particular). Top AI scientists are one thing (though if they're allowed to enter on the grounds of "winning the race," they need to be watched and prohibited from leaving - if you can't do that, don't let them in either), but students, who can't contribute to the US effort but can commit espionage and crowd at American talent, are something else.
